Experts in the provision of washroom services

# Washroom Services

Washroom waste consists of feminine hygiene waste, incontinence pads and disposable nappy waste, produced in the public and private sectors.

## How we manage washrooms

With a servicing plan to suit you, our bespoke washroom services covers all aspects; from feminine hygiene bin liner exchange, nappy disposal unit decanting, vending machine maintenance to the installation of air freshener units - everything you need to have a clean and hygienic washroom is catered for with Novus Washrooms.

## What we offer

Novus Washrooms covers all aspects of your washroom needs including:

- Feminine hygiene bins
- Nappy bins
- Vending services
- Air freshener units
- Hand dryers
- Soap dispensers
- Odour eliminators
- Urinal services
- Mat servicing

## Paper products

Our paper products are simple and convenient to use. With a comprehensive range from dispensers and centrefeed rolls to toilet paper, there is a suitable paper product for every requirement.

Paper products make for a quick and easy disposal method aiding optimum hygiene control and infection prevention.

Our products offer top value and our direct delivery service ensures a reliable and effective service for peace of mind.

For advice on your washroom needs and a quotation for servicing, contact us on **0844 770 0012**

# Introducing The **BioFlush** Urinal System

Compact design

Eco friendly

Odour control

Economic value

Easy to maintain

Simple to install

## The **BioFlush** Urinal System

Convert your standard urinals into odour free and waterless systems with **BioFlush**. Designed to replace U-Bend drainage pipes, the **BioFlush** urinal system features a fragrance enhanced enzyme block to break down uric acid crystals and uses a one-way valve to prevent odours from escaping, leaving your washroom smelling clean and fresh. The design of the system means that odours are captured under the water line, preventing them from entering the washroom, while the cap provides protection from unwated blockages. The compact design and eco-friendly technology means that you could save an average of £300-£400 per urinal per year, through conserving water and saving energy.

# Urinal Mat and Ball System

Long  
lasting

Eco  
friendly

Combats  
malodour

Blockage  
control

Easy to  
maintain

Simple to  
install

## Urinal Mat and Ball

Increase the hygiene level of your urinals with the Urinal Mat and Ball system. The ergonomic triangular design of the mat prevents splash-back and helps to reduce blockages, whilst the ball breaks down uric acid crystals, to ensure that waste pipes are kept clearer for longer and is fragranced to combat malodour. This style of urinal maintenance can be used in conjunction with a flush control system and has incredible longevity - with each of the refill balls lasting up to 30 days, making for a cost effective and easy to maintain 12 month urinal hygiene solution.

# Mat Servicing

Heat and  
stain  
resistant

Workplace  
compliant

100%  
recycled

Reduces  
slips, trips  
and falls

Super  
absorbant

Economic  
value

## Floor Mats

With heat and stain resistance technology, our floor mats make the perfect accessory for any door way. Made from Pheonix fibre, a 100% recycled material, each mat can hold up to 6 kilograms in dirt and 3 litres of water. The superstyrene rubber used on the back of these mats means that they will stay completely flat - helping to reduce slips, trips and falls and aid your Workplace Regulations. Available in a variety of sizes, colours and servicing plan to suit you, each mat is designed to meet your specific needs.
